RE: Keddy Mill Superfund Site, Windham, Maine (Site)

Dear Ken:

Per your request, enclosed please find a compact disc with the attachments that were sent to EPA by ITT Corporation in its October 27, 2016 response to EPA's July 28, 2016 General Notice Letter of Potential Liability relating to the above-referenced Site.

Also, it has come to my attention that Sappi North America recently entered into a settlement to remove two spillways and to install a fish passage system on the Presumpscot River. My understanding is that the company also agreed to either remove or provide fish passage around the dams at Little Falls and Mallison Falls once a pre-determined number of American shad and river herring are counted passing Saccarappa Falls. Please ensure that Sappi keeps EPA promptly informed about any proposed modification or removal of any dam structures that are likely to impact the cleanup at the Site.

Best regards,

A handwritten signature in black ink, appearing to read "Susan Scott", is written over a horizontal line.

Susan Scott  
Senior Enforcement Counsel
